DETAILED ACTION

Response to Amendment

1. Applicant's amendments with respect to claims filed 12/11/2000 have been considered, an action on the merits follows.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5, 9-15, 19-25, 29-35 & 39-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Kauffman, (U.S. Pat # 5,003,591).

Considering claim 1, 11, 21 & 31, the amended claimed method and system for transmitting data from a transmission apparatus to one of plurality of receiving terminals, comprising transmitting a unique terminal information identifying one of the receiver and an update program to change the processing of the one of the terminals, is met by Kauffman, which is directed to downloading firmware to addressable terminals; see Abstract & col. 3, lines 39-42.

Art Unit: 2611

The additionally claimed feature of updating the processing of one of the receiving terminals also reads on the operation of Kauffman, col. 5, lines 10-30.

Considering claims 2-4, 12-14, 22-24 & 32-34, the claimed features are met by the disclosure of Kauffman of a two-way system that enables the subscriber to retrieve services, col. 8, lines 25-68. The software used to interact with the two-way system is included in firmware downloaded to the subscriber.

Considering claims 9, 19, 29 & 39 the services requested by the subscriber are displayed on the TV screen in Kauffman.

Considering claims 10, 20, 30 & 40, the unique address is fixedly assigned to each terminal.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 6-8, 16-18, 27-28 & 36-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kauffman.

Art Unit: 2611

Considering claims 6, 16, 26 & 36, Official Notice is taken that at the time the invention was made, satellite transmission was known in the art. It would have been obvious for one of ordinary skill in the art at the time the invention was made, to modify Kauffman to utilize satellite technology at least for the advantage of reaching a wider range of subscribers.

Considering claims 7, 17, 27 & 37, Official Notice is taken that at the time the invention was made, Internet transmission was known in the art. It would have been obvious for one of ordinary skill in the art at the time the invention was made, to modify Kauffman to utilize Internet technology at least for the advantage of reaching a wider range of subscribers.

Considering claims 8, 18, 28 & 38, Official Notice is taken that at the time the invention was made, terrestrial transmission was known in the art. It would have been obvious for one of ordinary skill in the art at the time the invention was made, to modify Kauffman to utilize terrestrial technology at least for the advantage of reaching a wider range of subscribers

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

A) Kaufman Teaches an addressable terminal.
